

## About Tamás:

Probably one of the hardest thing is when one has to write about himself. I finished secondary school in in Nigeria, Lagos at St' Gregs in 1976. Afterwards returned to Hungary, and studied to become a civil engineer and obtained an MSc degree in 1983. I am working since, at first in the field of design, then as a constructor, project manager, independent engineer and finally in the tertiary education. During all these carried out part time private practices as a designer and as an expert.

Dr. Tamás Simon

Birthdata

30. March 1956.

Marital status

Married, 2 children.

Qualification

MsC civil engineer, Ph.D.

Language
